TOXICOLOGICAL INFORMATION

Information on toxicological effects

Health hazard summary	Highly reactive. Due to the product encapsulation, exposure to contents is not anticipated with normal use. Use safe work practices to avoid dust/fume inhalation after detonation. WARNING: May explode with shock, heat, friction or static charge.
Eye	Due to product form, exposure can only occur during detonation. Serious eye damage may result from explosive fragments.
Inhalation	Due to product form, an inhalation hazard is not anticipated with normal use. However, detonation in poorly ventilated areas may result in the generation of toxic fumes which may lead to adverse health effects with over exposure.
Skin	Due to product form, exposure can only occur during detonation. Serious damage may result from explosive fragments.
Ingestion	Ingestion is considered unlikely due to product form. However, ingestion of contents of the enclosed product may result in gastrointestinal irritation, nausea, headache, dizziness and diarrhoea.
Toxicity data	No LD50 data available for this product.
